

EXCEL TO REVIT IMPORTER

It is a tool that imports the user specified/selected cells to Revit families/Projects. Imports excel data as native Revit model

BIM DATA EXCHANGE SOLUTIONS

BIMDeX provides a platform for effortless data exchange between various CAD, Design and BIM softwares. BIF is a global standard for data exchange across various industries

An innovation in BIM industry.

An award winning product providing seamless data integration of BIM softwares with mechanical models.

Key Features and Benefits:

- Maintains all Excel data properties such as Font Style, Cell space, Merged cells, Text Direction, etc.,
- The tool has various options to define the insertion point, the border, and the type of import
- Minimizes of design error by more than 50%
- Imported data will be created and loaded in Revit as Projects/Families
- Imports the excel data similar as a native Revit model
- Faster design iterations
