

REVIT TO RHINO EXPORTER

Revit to Rhino Exporter is a data exchange tool to export your Revit 3d model to Rhino with all metadata and geometry maintained

FEATURES & BENEFITS

- Convert all your Revit Families/Projects to native Rhino blocks and nested blocks.
- Export based on views from Revit and simplify the export based on the user's choice
- Export models with parameter and material information and maintain the same in Rhino
- Obtain non-triangulated solid geometry
- Instantiate Revit system families and objects
- Transfer all parameters and materials as well
- Exclude materials and Ignore Hierarchy grouping while importing and customize component grouping based on categories
- Simplify your models with the user-friendly interface combined with easy operation to assist novice and experienced designers alike
