

RHINO TO CREO EXPORTER

Rhino to Creo Exporter is a data exchange tool which creates Creo parts and assemblies from Rhino Blocks

FEATURES & BENEFITS

- Convert all your Rhino geometry like NURBS surfaces, meshes etc. to native SolidWorks Parts and Assemblies
- Export based on your desired layers, block name or group name and group the geometry based on Layer Hierarchy or Layer Name or Object type
- Export models based on Internal Origin or Named C plane from Rhino and Include or Exclude Locked components, Hidden components, Duplicated Components, Attachment and Orphan geometries
- Smoothen the edges for meshes and obtain non-triangulated solid geometry
- Instantiate the blocks and maintain the hierarchy inside Creo
- Export models with parameter and material information (RGB colors) and maintain the same in Creo.
- Make use of various features to simplify your models with the user-friendly interface combined with easy operation to assist novice and experienced designers alike

Other Products
