

RHINO TO INVENTOR EXPORTER

Rhino to Inventor Exporter is a data exchange tool which creates Native SketchUp Components from the Revit Families/Projects.

FEATURES & BENEFITS

- Convert all your Rhino geometries to native Inventor model.
- Export based on your desired layers, block name or group name and group the geometry based on Layer Hierarchy or Layer Name or Object type.
- Export models based on Internal Origin from Rhino
- Obtain non-triangulated solid geometry.
- Instantiate the blocks and maintain the hierarchy inside Inventor.
- Include or Exclude Locked components, Hidden components, Duplicated Components, Attachment and Orphan geometries..
- Export models with parameter and material information (RGB colors) and maintain the same in Inventor..
- Simplify your models with the user-friendly interface combined with easy operation to assist novice and experienced designers alike.

Other Products

- Revit to SolidWorks Exporter
