

# RHINO TO REVIT EXPORTER

Rhino to Revit Exporter is a data exchange tool to export your Rhino 3d model to Revit with all metadata and geometry maintained

# FEATURES & BENEFITS

---

- Convert all your Rhino geometry like NURBS surfaces, meshes etc. to native Revit families (rfa) and projects (rvt)
- Export based on your desired layers, block name or group name and group the geometry based on Layer Hierarchy or Layer Name or Object type
- Export models based on Internal Origin or Named C plane from Rhino and Include or Exclude Locked components, Hidden components, Duplicated Components, Attachment and Orphan geometries
- Smoothen the edges and obtain non-triangulated solid geometry
- Instantiate the blocks and maintain the heirarchy inside Revit
- Transfer all parameters and materials as well
- Import the models in your custom Revit template and Assign individual Revit categories to your parts
- Make use of various features to simplify your models with the user-friendly interface combined with easy operation to assist novice and experienced designers alike
