# BIMDeX
A Unit of SrinSoft Inc

CREO
TO REVIT
EXPORTER

Expose Creo platform into the BIM environment with easy transfer of Creo model to Revit through the BIMDeX customized and safe data exchange platform.

PART/ASSEMBLY TO FAMILY/PROJECT

Convert all your Creo Assemblies (.asm) and Parts (.prt) to native Revit families (rfa) and projects (rvt).

SIMPLIFIED REPRESENTATION EXPORT

Export based on your desired Simplified Representation in Creo to exchange only the necessary components.

EXCLUSION / SIMPLIFICATION OPTIONS

Option to exclude shrinkwrapped and Hidden Components

CATEGORY MAPPING

Creo parts and assemblies can be mapped to specific categories in Revit while importing.

MAINTAIN INSTANCES

BIMDeX Instantiates Creo Parts and Assemblies inside Revit for ease of editability and facilitates better BOQ generation

MODEL HIERARCHY

Hierarchy of the Creo model will be maintained in Revit and users have an option to collapse/flatten the hierarchy based on the requirement. Creo Assemblies and Sub-Assemblies will be converted as Nested families in Revit.

METADATA INFORMATION

All the metadata information from Creo can be transferred to Revit and users have the option to make it as Shared parameters in Revit. User can also choose only the required properties

IMPORT BASED ON COORDINATES

Users can both export and import the models based on the desired Coordinate system.
