# BIMDeX
A Unit of SrinSoft Inc

REVIT
TO CREO
EXPORTER

Expose Revit BIM platform into the 3D CAD Design environment with easy transfer of Revit model to Creo through the BIMDeX customized and safe data exchange platform

FAMILY/PROJECT TO PART/ASSEMBLY

Convert all your Revit Families (.rfa) and Projects (.rvt) to native Creo Assemblies (.asm) and Parts (.prt)

VIEW BASED EXPORT

Export based on your desired 3D views from Revit to exchange only the necessary components.

GROUPING OPTION

Option to Group families based on Category and Family Types which will be created as Sub-Assemblies in the Creo model.

EXCLUSION / SIMPLIFICATION OPTIONS

Option to exclude Import Instances & Revit Links from Revit Exporter

MAINTAIN INSTANCES

BIMDeX Instantiates Revit Families inside Creo for ease of editability and better performance

MODEL HIERARCHY

Users have an option to collapse/flatten the hierarchy based on the requirement.

METADATA INFORMATION

All the metadata information from Revit can be transferred to Creo and users have the option to control the required parameters to be exported.

EXPORT BASED ON COORDINATES

Option to export the Revit models based on the desired Coordinate system
